

Guide to Security

Examples of security devices are shown below.

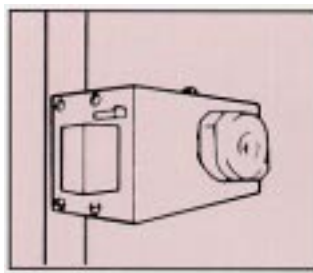

Final exit door - mortice deadlock which conforms to BS3621 or a lock of higher quality.

If any door is not thick enough for a mortice deadlock other high security cylinder rim deadlocks are suitable.

Mortice Deadlocks

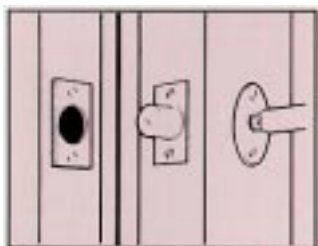

Chubb 3G114, 3G220, 3G117, 3K77
Era E208, E210
Ingersoll M50, M52
Union 2151
Yale PM562, PM560, PM5511, PM5512
Banham S363

Cylinder Rim Deadlocks

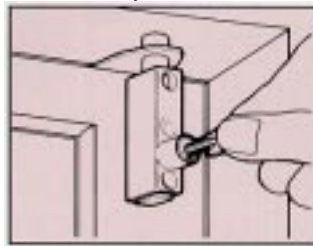

Chubb 4L67
Ingersoll NS80, SC71
Union 1332, 1334
Yale PBS1, PBS2
Banham L111

Other external doors - mortice deadlock to the same standard as the final exit door or two key operated mortice or surface mounted security bolts with removable keys sited near the top and bottom of the door. With french windows and two leaf doors these bolts should be fitted on each leaf and used in conjunction with any centre lock already fitted.

Mortice Security Bolts

Chubb 8002, 8006
Era 838
Ingersoll DSB1
Union 8601
Yale PM444
Banham R102

Surface Mounted Bolts

Chubb 8K116
Era 805, 806
Ingersoll ALB1
Yale P124

Patio doors - special locks designed to secure the door at the top and bottom. A stop must be fitted to prevent the doors being lifted out of their frame.

Chubb 8K107, 8K119
Era 100
Ingersoll PDL1
Union 7200
Yale P114

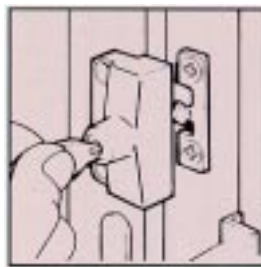

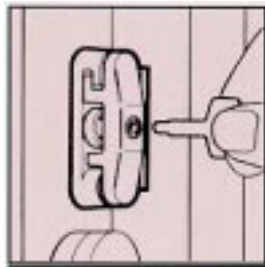

All accessible windows including skylights and fanlights which can be reached from flat roofs - key operated locks or security bolts where keys can be removed.

Sash - Chubb 8K108, WS1, Era 804, 822, Ingersoll SW66, Union 7126, 7127, Yale P114

Casement - wood - Chubb 8K101, 102, Era 802, 809, Ingersoll SL60, CW69, Union 7124, 7125, Yale P112, P113

Casement - metal - Chubb 8K100, 8012, Era 856, 901, Ingersoll SL60, Yale P115

Louvre windows - slats should be glued with epoxy resin and a special louvre lock fitted.

Fanlights - Era 825, 827, Ingersoll FM68, Yale P111.

Your local Crime Prevention Officer or locksmith will be able to advise on suitable locks and other devices where special fittings may be required.
